Bio-Inspired Neural Dynamics & Active Inference Simulation Platform

Compare synthetic measurement qualifications and check declared source, rights, split and protocol prerequisites before any external benchmark admission.

Product overview

Developed neural-research software for finite synthetic qualification comparisons and bounded, data-free external benchmark entry checks.

Potential acquirers

- Computational-neuroscience research teams
- Research-software and simulation vendors
- Neural-systems methodology and evaluation groups

Documented functions

- Compose source-locked synthetic neural studies
- Compare bounded measurement and observation qualifications
- Preserve indistinguishable model alternatives
- Check declared source, rights, split and protocol conditions
- Verify bounded local payload integrity without dataset admission

Available output types

Synthetic cross-qualification and witness reports / Source-entry and local-integrity assessments / Schema-checked comparison and lineage packages

Scientific observation & life sciences

Defined work.
Separate written terms.

SELLER ASKING REFERENCE / AS IS	CURRENT OFFERED POSITION
EUR 964,000	**Developed software**

Current scope and conditions

Developed research or product software within the identified edition and material boundaries. Intended-use and recipient acceptance remain separate.

Available for acquisition discussion

Identified edition: 2.9.15 / qualified CPU software scope

• Retained qualification applies to its identified source and environment. Full replay in a different local environment still has unresolved numerical discrepancies; recipient-environment acceptance remains open.

• Cross-qualification results are finite synthetic comparisons. Data-free source-entry checks assess declarations and local integrity; they do not admit a real dataset or establish source authenticity or legal clearance.

• External scientific benchmarking remains closed. No unique biological mechanism, EEG/BCI validity, causal or clinical finding, AGI or production readiness is established.

Offered first-party perimeter

• The specifically agreed first-party software or research work product

• Associated first-party product documentation and retained evaluation material

• The expressly agreed transferable first-party rights

Separately scoped or excluded

Third-party software, data, media, models and service entitlements beyond their own terms

Personal, customer and author content, private accounts and credentials

Future development, hosting, hardware, support and operating businesses unless expressly agreed

Buyer information and next step

Quote TA-IP-077 and the project title when discussing your intended use through the verified seller contact channel supplied with this portfolio. Detailed diligence is handled through an agreed review process.

The asking reference is an indicative seller choice, not an independent market appraisal. Rights, exact delivery, acceptance, consideration and taxes require separate written terms. Viewing this document grants no software or IP rights. Buyer descriptions indicate potential fit, not existing customers or contracts.

Prices & sources.

Price basis: 2026-11-01. EUR is the reference currency; market value is not established.

PRICE / MODEL REFERENCE	EUR	USD - indicative
Seller asking reference	964,000	1,076,981
Negotiation reference - low	770,500	860,803
Negotiation reference - high	1,207,500	1,349,019
Recreation cost estimate	3,436,500	3,839,258
Marketability cost scenario	3,359,179	3,752,875
Monetisation cost scenario	3,943,384	4,405,549
Risk-adjusted strategic reference	3,389,197	3,786,411
Weighted economic reference	3,505,857	3,916,743

Milestone-conditioned reference

Not established. No independently supported higher maturity amount or new attributable market/income evidence is established.

This is a conditional maturity sensitivity, not a current asking price, forecast or established market value.

Cost basis

The retained priced scope and successive non-overlapping budgets reconcile below. Equivalent effort and historical anchors are seller assumptions, not actual expenditure, independent quotations or market value. Previously priced neural runtime, synthetic studies and scenario availability, erasure and recovery foundations are reused once. Only the added cross-qualification audit and data-free benchmark-entry software are included. Real dataset admission, scientific or clinical findings, universal numerical portability, external data rights and future phases are excluded.

Partial scoped budget; retained anchor remains provisional. Budget coverage concerns the stated priced scope; independent quotation and market value are not established.
