Air-to-Water Transition Vehicle

Explore a conceptual air-to-water vehicle in simulation and review how its control choices affect the model.

Product overview

A software-only vehicle research environment for studying an air-to-water transition concept.

Documented functions

- Run transition simulations
- Compare control studies
- Inject modelled faults
- Replay experiment histories
- Retain validation records

Potential buyer fit

Vehicle simulation developers / Aerospace research groups / Control research teams

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Simulation histories / Control comparisons / Study reports

Profile and full editable brief

https://thearchitect-max.github.io/MyProjects/projects/air-to-water-transition-vehicle/

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 40,000	**EUR 400,000**

Current repository documentation

Current main baseline: v8 Master.

An implemented prototype for evaluation and further development.

Material limitations: No physical vehicle is included. Model results do not establish aerodynamic, hydrodynamic or structural feasibility.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Commercial and delivery boundary

The asking reference and seller-estimated cost to recreate comparable work retain the existing individual assessment. They are not historical expenditure, a contractor quotation, an independent appraisal, demonstrated revenue or a guaranteed buyer saving.

AS IS acquisition is subject to a separate written agreement defining the first-party rights, exact version, delivery manifest and acceptance. Third-party software, data, models, media and service rights retain their own terms. Future development, hosting, operational support, customer content and private credentials are separately scoped or excluded.

Source basis

TA-IP-017-P: product documentation reviewed 16 October 2026. TA-IP-017-C: retained commercial register. TA-IP-017-A: dated seller handover assessment. This catalogue review did not rerun product tests or certify legal, scientific, security or production acceptance.
