ATHANOR Adaptive Topology, Hazard Analysis, Network Optimization & Resilience

Compare recovery options when your network is disrupted, and review the evidence behind each choice.

Product overview

A resilience research asset for comparing recovery choices under network disruption.

Documented functions

- Create controlled disruption studies
- Compare recovery alternatives
- Assess uncertainty
- Review reasons for selected actions
- Retain repeatable evaluation records

Potential buyer fit

Infrastructure engineering teams / Network research groups / Resilience consultancies

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Recovery comparisons / Scenario reports / Decision records

Profile and full editable brief

https://thearchitect-max.github.io/MyProjects/projects/athanor/

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 95,000	**EUR 520,000**

Current repository documentation

Current main baseline: 3.5.0.

Available software for evaluation against your intended use. Deployment suitability is assessed separately.

Material limitations: Comparisons concern declared software scenarios. Biological interpretations and production-network performance are not established by these experiments.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Commercial and delivery boundary

The asking reference and seller-estimated cost to recreate comparable work retain the existing individual assessment. They are not historical expenditure, a contractor quotation, an independent appraisal, demonstrated revenue or a guaranteed buyer saving.

AS IS acquisition is subject to a separate written agreement defining the first-party rights, exact version, delivery manifest and acceptance. Third-party software, data, models, media and service rights retain their own terms. Future development, hosting, operational support, customer content and private credentials are separately scoped or excluded.

Source basis

TA-IP-002-P: product documentation reviewed 16 October 2026. TA-IP-002-C: retained commercial register. TA-IP-002-A: dated seller handover assessment. This catalogue review did not rerun product tests or certify legal, scientific, security or production acceptance.
