Aurynthiq Autonomous DJ Intelligence Platform

Prepare DJ sets from your own authorised music, audition transitions and review proposed combinations between recordings.

Product overview

A bring-your-own-music prototype for candidate DJ and mashup discovery.

Documented functions

- Import permitted private music
- Organise a private library
- Screen candidate track combinations
- Audition reviewed previews
- Record permitted export decisions

Potential buyer fit

DJ software vendors / Creator-tool developers / Music production teams

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Candidate pairings / Private previews / Analysis and export records

Profile and full editable brief

https://thearchitect-max.github.io/MyProjects/projects/aurynthiq-autonomous-dj-intelligence-platform/

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 46,000	**EUR 290,000**

Current repository documentation

Current main baseline: 0.12.0.

Evaluate the v0.12 local music-library and audition prototype using your own authorised recordings. All 184 local software tests passed. Music rights, listening quality, supported-hardware performance and production use require separate acceptance; the optional model-backed full-song separation path remains unqualified.

Material limitations: Musical compatibility is heuristic and quality superiority is unproven. No music catalogue or qualified production SaaS is included.

Next qualification step: Agree the exact v0.12 first-party source and prototype delivery manifest, supported dependencies and recipient acceptance checks.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Commercial and delivery boundary

The asking reference and seller-estimated cost to recreate comparable work retain the existing individual assessment. They are not historical expenditure, a contractor quotation, an independent appraisal, demonstrated revenue or a guaranteed buyer saving.

AS IS acquisition is subject to a separate written agreement defining the first-party rights, exact version, delivery manifest and acceptance. Third-party software, data, models, media and service rights retain their own terms. Future development, hosting, operational support, customer content and private credentials are separately scoped or excluded.

Source basis

TA-IP-093-P: product documentation reviewed 16 October 2026. TA-IP-093-C: retained commercial register. TA-IP-093-A: dated seller handover assessment. This catalogue review did not rerun product tests or certify legal, scientific, security or production acceptance.
