Autonomous Adaptation Framework

Evaluate recovery options when a system degrades, and examine whether continuity can be preserved.

Product overview

A resilience research asset for controlled recovery when systems degrade.

Documented functions

- Detect modelled degradation
- Preserve a trusted operating scope
- Study recovery choices
- Review continuity conditions
- Retain conformance and execution evidence

Potential buyer fit

Reliability software vendors / Systems research teams / Platform engineering groups

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Recovery plans / Continuity studies / Qualification records

Profile and full editable brief

https://thearchitect-max.github.io/MyProjects/projects/autonomous-adaptation-framework/

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 360,000	**EUR 1,650,000**

Current repository documentation

Current main baseline: 0.23.0.

The latest build is awaiting qualification; the earlier evaluated baseline remains separate.

Material limitations: Finite-model checks, software execution and external-target evidence remain distinct. Production resilience is not implied.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Commercial and delivery boundary

The asking reference and seller-estimated cost to recreate comparable work retain the existing individual assessment. They are not historical expenditure, a contractor quotation, an independent appraisal, demonstrated revenue or a guaranteed buyer saving.

AS IS acquisition is subject to a separate written agreement defining the first-party rights, exact version, delivery manifest and acceptance. Third-party software, data, models, media and service rights retain their own terms. Future development, hosting, operational support, customer content and private credentials are separately scoped or excluded.

Source basis

TA-IP-027-P: product documentation reviewed 16 October 2026. TA-IP-027-C: retained commercial register. TA-IP-027-A: dated seller handover assessment. This catalogue review did not rerun product tests or certify legal, scientific, security or production acceptance.
