# Bio-Inspired Neural Dynamics & Active Inference Simulation Platform

Study brain-inspired learning and behaviour through repeatable computational experiments.

## Product overview

A computational-neuroscience asset for repeatable learning and behaviour studies.

## Documented functions

- Run controlled neural-dynamics studies
- Compare interventions
- Review multi-source research evidence
- Assess robustness boundaries
- Retain repeatable evaluation records

## Potential buyer fit

Neuroscience research groups / AI research teams / Scientific software vendors

Buyer profiles are positioning suggestions; they are not established customers or contracts.

## Documented output types

Neural study reports / Intervention comparisons / Qualification evidence

## Profile and full editable brief

https://thearchitect-max.github.io/MyProjects/projects/bio-inspired-neural-dynamics-active-inference-simulation-platform/

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

# Status and commercial reference

| SELLER ASKING REFERENCE | RECREATION ESTIMATE |
| --- | --- |
| **EUR 925,000** | **EUR 3,300,000** |

## Current repository documentation

Current main baseline: 2.2.0.

Separate development: 2.2.0 hardened draft candidate.

Use the retained v2.1.0 validated research baseline and review the newer v2.2.0 candidate separately. Full candidate validation remains outstanding.

Material limitations: The project does not establish biological-brain equivalence or clinical validity. Candidate research and retained validation remain separate.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

## Commercial and delivery boundary

The asking reference and seller-estimated cost to recreate comparable work retain the existing individual assessment. They are not historical expenditure, a contractor quotation, an independent appraisal, demonstrated revenue or a guaranteed buyer saving.

AS IS acquisition is subject to a separate written agreement defining the first-party rights, exact version, delivery manifest and acceptance. Third-party software, data, models, media and service rights retain their own terms. Future development, hosting, operational support, customer content and private credentials are separately scoped or excluded.

## Source basis

TA-IP-077-P: product documentation reviewed 16 October 2026. TA-IP-077-C: retained commercial register. TA-IP-077-A: dated seller handover assessment. This catalogue review did not rerun product tests or certify legal, scientific, security or production acceptance.
