Collective Reality Engine

Explore shared fictional worlds, review the consequences of participant decisions and preserve a consistent history of each scenario.

Product overview

A shared-world pre-alpha asset for consistent history and participant-limited views.

Documented functions

- Define shared-world scenarios
- Review proposed participant actions
- Retain committed world histories
- Present permitted viewpoints
- Replay narrative consequences

Potential buyer fit

Interactive storytelling studios / Game-tool developers / Simulation research groups

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Scenario worlds / Event histories / Replayable narrative records

Profile and full editable brief

https://thearchitect-max.github.io/MyProjects/projects/collective-reality-engine/

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 24,000	**EUR 80,000**

Current repository documentation

Current main baseline: 0.3.0.

Evaluate a local shared-world prototype with two fictional scenarios and repeatable histories. All 41 local tests and the demonstration passed. Rights documentation and the delivery package remain incomplete; online multiplayer, AI actors and large-scale operation are not established.

Material limitations: Online multiplayer, large-scale operation and deployed AI actors are not established. Fictional scenario assets retain their agreed rights perimeter.

Next qualification step: Resolve the missing explicit rights and agreed-transfer documentation; the source policy deliberately does not grant a general software licence.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Commercial and delivery boundary

The asking reference and seller-estimated cost to recreate comparable work retain the existing individual assessment. They are not historical expenditure, a contractor quotation, an independent appraisal, demonstrated revenue or a guaranteed buyer saving.

AS IS acquisition is subject to a separate written agreement defining the first-party rights, exact version, delivery manifest and acceptance. Third-party software, data, models, media and service rights retain their own terms. Future development, hosting, operational support, customer content and private credentials are separately scoped or excluded.

Source basis

TA-IP-104-P: product documentation reviewed 16 October 2026. TA-IP-104-C: retained commercial register. TA-IP-104-A: dated seller handover assessment. This catalogue review did not rerun product tests or certify legal, scientific, security or production acceptance.
