Electric Flight Systems Simulation & Validation Platform

Explore electric-flight concepts and compare simulated behaviour before physical testing.

Product overview

An electric-flight research foundation for early simulation and control experiments.

Documented functions

- Run electric-flight simulations
- Study altitude control
- Compare energy behaviour
- Inject modelled failures
- Record experimental telemetry

Potential buyer fit

Electric-flight research groups / Simulation developers / Engineering education providers

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Flight-study records / Fault scenarios / Engineering reports

Profile and full editable brief

https://thearchitect-max.github.io/MyProjects/projects/electric-flight-systems-simulation-validation-platform/

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 50,000	**EUR 450,000**

Current repository documentation

Current main baseline: 0.2.0.

An implemented prototype for evaluation and further development.

Material limitations: This is an early simulation and prototyping asset. It is not accepted operational flight software or a high-fidelity certified vehicle model.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Commercial and delivery boundary

The asking reference and seller-estimated cost to recreate comparable work retain the existing individual assessment. They are not historical expenditure, a contractor quotation, an independent appraisal, demonstrated revenue or a guaranteed buyer saving.

AS IS acquisition is subject to a separate written agreement defining the first-party rights, exact version, delivery manifest and acceptance. Third-party software, data, models, media and service rights retain their own terms. Future development, hosting, operational support, customer content and private credentials are separately scoped or excluded.

Source basis

TA-IP-032-P: product documentation reviewed 16 October 2026. TA-IP-032-C: retained commercial register. TA-IP-032-A: dated seller handover assessment. This catalogue review did not rerun product tests or certify legal, scientific, security or production acceptance.
