Engineering Intelligence & Mastery Platform (EIMP)

Organise engineering knowledge, assess your understanding and support better-informed technical decisions.

Product overview

An engineering knowledge workbench for specialist research, learning structure and assessment inputs.

Documented functions

- Organise engineering knowledge domains
- Allocate specialist research scope
- Track evidence and research gaps
- Prepare assessment inputs
- Review knowledge-promotion status

Potential buyer fit

Engineering education vendors / Research organisations / Technical knowledge teams

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Research programmes / Learning structures / Gap and evidence reports

Profile and full editable brief

https://thearchitect-max.github.io/MyProjects/projects/engineering-intelligence-mastery-platform/

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 80,000	**EUR 450,000**

Current repository documentation

Current main baseline: 0.50.0.

An implemented prototype for evaluation and further development.

Material limitations: Coherent software records do not turn research claims into verified engineering knowledge. Specialist research remains in progress.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Commercial and delivery boundary

The asking reference and seller-estimated cost to recreate comparable work retain the existing individual assessment. They are not historical expenditure, a contractor quotation, an independent appraisal, demonstrated revenue or a guaranteed buyer saving.

AS IS acquisition is subject to a separate written agreement defining the first-party rights, exact version, delivery manifest and acceptance. Third-party software, data, models, media and service rights retain their own terms. Future development, hosting, operational support, customer content and private credentials are separately scoped or excluded.

Source basis

TA-IP-036-P: product documentation reviewed 16 October 2026. TA-IP-036-C: retained commercial register. TA-IP-036-A: dated seller handover assessment. This catalogue review did not rerun product tests or certify legal, scientific, security or production acceptance.
