Industrial Predictive Maintenance & RUL Platform

Study equipment condition and compare remaining-life estimates to support your maintenance research.

Product overview

An industrial prediction asset for condition modelling and remaining-life studies.

Documented functions

- Organise machine telemetry
- Review data quality
- Compare condition models
- Estimate remaining service life
- Retain validation evidence

Potential buyer fit

Maintenance software vendors / Industrial research groups / Equipment-data teams

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Prediction records / Quality reports / Benchmark dossiers

Profile and full editable brief

https://thearchitect-max.github.io/MyProjects/projects/industrial-predictive-maintenance-rul-platform/

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 360,000	**EUR 1,000,000**

Current repository documentation

Current main baseline: 0.2.0.

Available software for evaluation against your intended use. Deployment suitability is assessed separately.

Material limitations: Software and synthetic studies are not evidence of field-wide accuracy. Customer telemetry and external data rights remain separately scoped.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Commercial and delivery boundary

The asking reference and seller-estimated cost to recreate comparable work retain the existing individual assessment. They are not historical expenditure, a contractor quotation, an independent appraisal, demonstrated revenue or a guaranteed buyer saving.

AS IS acquisition is subject to a separate written agreement defining the first-party rights, exact version, delivery manifest and acceptance. Third-party software, data, models, media and service rights retain their own terms. Future development, hosting, operational support, customer content and private credentials are separately scoped or excluded.

Source basis

TA-IP-059-P: product documentation reviewed 16 October 2026. TA-IP-059-C: retained commercial register. TA-IP-059-A: dated seller handover assessment. This catalogue review did not rerun product tests or certify legal, scientific, security or production acceptance.
