Integrated Media Production Engine

Manage your media-production work from source selection to review and delivery.

Product overview

A media-production workflow product for accountable stages and controlled delivery.

Documented functions

- Coordinate scripting and production stages
- Review media acquisition
- Track voice and subtitle work
- Recover interrupted jobs
- Control delivery and approval records

Potential buyer fit

Media software vendors / Production studios / Enterprise content teams

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Production packages / Stage records / Rights and delivery histories

Profile and full editable brief

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 430,000	**EUR 1,200,000**

Current repository documentation

Current main baseline: 0.24.0.

The 0.24.0 foundation adds durable artifact-deletion claims and verified byte/size readmission. Repository records report 324 local passes per Python version with native PostgreSQL tests skipped. Prior 0.23.1 native PostgreSQL PASS remains bound to that earlier source; full native 0.24 concurrency qualification is still required. Third-party media rights and provider adapters need separate acceptance.

Material limitations: Full native 0.24 database and concurrency acceptance remains open. A prior release PASS and substitute SQL checks do not close that gate.

Next qualification step: Complete the exact 0.24 native PostgreSQL and concurrency campaigns, and agree the permitted media/provider and delivery scope.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Commercial and delivery boundary

The asking reference and seller-estimated cost to recreate comparable work retain the existing individual assessment. They are not historical expenditure, a contractor quotation, an independent appraisal, demonstrated revenue or a guaranteed buyer saving.

AS IS acquisition is subject to a separate written agreement defining the first-party rights, exact version, delivery manifest and acceptance. Third-party software, data, models, media and service rights retain their own terms. Future development, hosting, operational support, customer content and private credentials are separately scoped or excluded.

Source basis

TA-IP-038-P: product documentation reviewed 16 October 2026. TA-IP-038-C: retained commercial register. TA-IP-038-A: dated seller handover assessment. This catalogue review did not rerun product tests or certify legal, scientific, security or production acceptance.
