# ISBR SecureTrace

Follow asset histories, review supporting records and assess what is ready for a documented handover.

## Product overview

A registry and assurance product for attributable assets, evidence and handover records.

## Documented functions

- Register digital asset identities
- Link claims to evidence
- Maintain record histories
- Prepare assurance dossiers
- Review transfer and recovery records

## Potential buyer fit

Registry software vendors / Assurance service firms / Enterprise audit teams

Buyer profiles are positioning suggestions; they are not established customers or contracts.

## Documented output types

Asset registries / Assurance dossiers / Transfer histories

## Profile and full editable brief

https://thearchitect-max.github.io/MyProjects/projects/isbr-securetrace/

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

# Status and commercial reference

| SELLER ASKING REFERENCE | RECREATION ESTIMATE |
| --- | --- |
| **EUR 650,000** | **EUR 2,800,000** |

## Current repository documentation

Current main baseline: 2.4.0.

Separate development: Assurance 5.1.

The released core and the newer assurance development line are presented separately.

Material limitations: The release and later development are separately recorded. Wet-laboratory results and regulatory certification are outside the established software scope.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

## Commercial and delivery boundary

The asking reference and seller-estimated cost to recreate comparable work retain the existing individual assessment. They are not historical expenditure, a contractor quotation, an independent appraisal, demonstrated revenue or a guaranteed buyer saving.

AS IS acquisition is subject to a separate written agreement defining the first-party rights, exact version, delivery manifest and acceptance. Third-party software, data, models, media and service rights retain their own terms. Future development, hosting, operational support, customer content and private credentials are separately scoped or excluded.

## Source basis

TA-IP-044-P: product documentation reviewed 16 October 2026. TA-IP-044-C: retained commercial register. TA-IP-044-A: dated seller handover assessment. This catalogue review did not rerun product tests or certify legal, scientific, security or production acceptance.
