Launch & Cislunar Transportation Engineering Platform

Assess launch and lunar transport options for your FusionLunar studies, compare their assumptions and review the evidence needed for further engineering.

Product overview

A transport-architecture research foundation for launch and lunar logistics choices.

Documented functions

- Describe mission requirements
- Compare transport routes
- Screen architecture choices
- Review reliability and logistics assumptions
- Retain decision evidence

Potential buyer fit

Aerospace consultancies / Mission architecture teams / Transport research groups

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Transport comparisons / Mission studies / Architecture review records

Profile and full editable brief

https://thearchitect-max.github.io/MyProjects/projects/launch-cislunar-transportation-engineering-platform/

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 15,000	**EUR 50,000**

Current repository documentation

Current main baseline: v0.1.0.dev0.

Separate development: v0.2 refueling-study candidate; unmerged.

Use the v0.1 transport-concept software for your FusionLunar studies. A separate unmerged v0.2 draft adds refueling and departure-study controls with isolated synthetic checks; full frozen-source integration and release qualification remain open. Flight qualification and completed joint FusionLunar integration are not established. Existing prices are retained.

Material limitations: The foundation is distinct from a qualified launch vehicle or flight system. Joint integration with energy studies and newer refuelling work remain separate.

Next qualification step: Evidence a reproducible release, agreed component and rights boundaries, use-specific qualification and recipient acceptance of the defined software package.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Commercial and delivery boundary

The asking reference and seller-estimated cost to recreate comparable work retain the existing individual assessment. They are not historical expenditure, a contractor quotation, an independent appraisal, demonstrated revenue or a guaranteed buyer saving.

AS IS acquisition is subject to a separate written agreement defining the first-party rights, exact version, delivery manifest and acceptance. Third-party software, data, models, media and service rights retain their own terms. Future development, hosting, operational support, customer content and private credentials are separately scoped or excluded.

Source basis

TA-IP-099-P: product documentation reviewed 16 October 2026. TA-IP-099-C: retained commercial register. TA-IP-099-A: dated seller handover assessment. This catalogue review did not rerun product tests or certify legal, scientific, security or production acceptance.
