Maastricht Zero-Hour Simulator

Explore the developing Maastricht driving-simulation project and its foundations for interactive vehicle scenarios.

Product overview

A Maastricht driving-simulation foundation for buyer-led completion.

Documented functions

- Prepare a city simulation project
- Configure vehicle and input foundations
- Record telemetry
- Review modelled damage components
- Retain session and validation records

Potential buyer fit

Driving simulation developers / Vehicle research teams / Interactive experience studios

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Simulation foundations / Telemetry records / Implementation documentation

Profile and full editable brief

https://thearchitect-max.github.io/MyProjects/projects/maastricht-zero-hour-simulator/

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 120,000	**EUR 650,000**

Current repository documentation

Current main baseline: 0.1.0.

A simulator foundation in development; the complete city model and validated vehicle behaviour remain unfinished.

Material limitations: A complete city, qualified vehicle physics and a compiled production baseline remain unfinished. High-fidelity scope is a development objective.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Commercial and delivery boundary

The asking reference and seller-estimated cost to recreate comparable work retain the existing individual assessment. They are not historical expenditure, a contractor quotation, an independent appraisal, demonstrated revenue or a guaranteed buyer saving.

AS IS acquisition is subject to a separate written agreement defining the first-party rights, exact version, delivery manifest and acceptance. Third-party software, data, models, media and service rights retain their own terms. Future development, hosting, operational support, customer content and private credentials are separately scoped or excluded.

Source basis

TA-IP-089-P: product documentation reviewed 16 October 2026. TA-IP-089-C: retained commercial register. TA-IP-089-A: dated seller handover assessment. This catalogue review did not rerun product tests or certify legal, scientific, security or production acceptance.
