Machine Cognition Research Framework

Study adaptation and decision behaviour through repeatable experiments and comparative review.

Product overview

A bounded cognition research framework for repeatable memory and adaptation experiments.

Documented functions

- Run controlled cognitive experiments
- Study memory and uncertainty
- Compare adaptation conditions
- Review component comparisons
- Export research evidence

Potential buyer fit

Cognition research groups / AI research teams / Scientific software developers

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Experiment records / Comparative studies / Research dossiers

Profile and full editable brief

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 80,000	**EUR 650,000**

Current repository documentation

Current main baseline: 0.8.0.

The 0.8.0 research prototype adds an explicitly trained predictive-state layer alongside its separate count-based adaptation. Training and held-out evaluation are separated and retained model checkpoints bind later research runs. This is a bounded deterministic research mechanism; general intelligence, autonomous action and human-equivalent cognition are not established.

Material limitations: Research mechanisms do not establish consciousness or general intelligence. Ordinary execution does not grant external action authority.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Commercial and delivery boundary

The asking reference and seller-estimated cost to recreate comparable work retain the existing individual assessment. They are not historical expenditure, a contractor quotation, an independent appraisal, demonstrated revenue or a guaranteed buyer saving.

AS IS acquisition is subject to a separate written agreement defining the first-party rights, exact version, delivery manifest and acceptance. Third-party software, data, models, media and service rights retain their own terms. Future development, hosting, operational support, customer content and private credentials are separately scoped or excluded.

Source basis

TA-IP-020-P: product documentation reviewed 16 October 2026. TA-IP-020-C: retained commercial register. TA-IP-020-A: dated seller handover assessment. This catalogue review did not rerun product tests or certify legal, scientific, security or production acceptance.
