Manuscript Integrity & Publishing Platform

Write and assemble your chapters, track editorial evidence and defects, and prepare an author-approved manuscript for manual publication handoff.

Product overview

A manuscript-production prototype for editorial evidence and author-controlled release.

Documented functions

- Write and assemble chapters
- Inspect ordinary manuscript inputs
- Track quality evidence and defects
- Record explicit author release decisions
- Prepare manual publication handovers

Potential buyer fit

Author-software vendors / Editorial teams / Small publishing houses

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Assembled manuscripts / Editorial evidence records / Offline handover packages

Profile and full editable brief

https://thearchitect-max.github.io/MyProjects/projects/manuscript-integrity-publishing-platform/

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 21,000	**EUR 70,000**

Current repository documentation

Current main baseline: 0.1.0.

Separate development: 0.7.0 - documented offline staging; full application source import pending.

The repository still delivers the 0.1.0 editorial QA application. Later documents through 0.7 record creative-module curation, genre/style controls, originality work and complete author-archive placement as separate offline staging. Full later application sources are not imported and remain outside the existing 0.1 asking/recreation scope. The retained 0.1 tests and later reported checks retain their own source and execution dates.

Material limitations: Later staged application source is not yet part of the delivered repository package or its retained price. Editorial, rights, rendering and distributor acceptance need actual evidence.

Next qualification step: Import and integrity-check the complete staged application, then independently rerun its behavior, manuscript rendering and editorial qualification before extending the delivered software scope.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Commercial and delivery boundary

The asking reference and seller-estimated cost to recreate comparable work retain the existing individual assessment. They are not historical expenditure, a contractor quotation, an independent appraisal, demonstrated revenue or a guaranteed buyer saving.

AS IS acquisition is subject to a separate written agreement defining the first-party rights, exact version, delivery manifest and acceptance. Third-party software, data, models, media and service rights retain their own terms. Future development, hosting, operational support, customer content and private credentials are separately scoped or excluded.

Source basis

TA-IP-106-P: product documentation reviewed 16 October 2026. TA-IP-106-C: retained commercial register. TA-IP-106-A: dated seller handover assessment. This catalogue review did not rerun product tests or certify legal, scientific, security or production acceptance.
