ModularKey Cryptanalysis Platform

Explore classical ciphers, test candidate interpretations and review your cryptanalysis results.

Product overview

A classical-cipher analysis product with repeatable transformation and candidate-review workflows.

Documented functions

- Work with configurable symbol sets
- Transform classical cipher material
- Analyse candidate readings
- Review key-recovery results
- Retain reproducible analysis

Potential buyer fit

Cryptography education providers / Historical-text researchers / Security research teams

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Candidate readings / Analysis reports / Validation records

Profile and full editable brief

https://thearchitect-max.github.io/MyProjects/projects/modular-key-cryptanalysis-platform/

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 95,000	**EUR 450,000**

Current repository documentation

Current main baseline: 2.1.0.

Available software for evaluation against your intended use. Deployment suitability is assessed separately.

Material limitations: Classical-cipher research is distinct from modern production encryption. Recovery quality depends on the supplied material.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Commercial and delivery boundary

The asking reference and seller-estimated cost to recreate comparable work retain the existing individual assessment. They are not historical expenditure, a contractor quotation, an independent appraisal, demonstrated revenue or a guaranteed buyer saving.

AS IS acquisition is subject to a separate written agreement defining the first-party rights, exact version, delivery manifest and acceptance. Third-party software, data, models, media and service rights retain their own terms. Future development, hosting, operational support, customer content and private credentials are separately scoped or excluded.

Source basis

TA-IP-007-P: product documentation reviewed 16 October 2026. TA-IP-007-C: retained commercial register. TA-IP-007-A: dated seller handover assessment. This catalogue review did not rerun product tests or certify legal, scientific, security or production acceptance.
