MOTHERCODE Research Engine

Explore learning and memory in brain-inspired research models and compare their observed behaviour.

Product overview

An experimental neural-dynamics research asset for repeatable computational studies.

Documented functions

- Run neural-dynamics experiments
- Compare declared study settings
- Retain reproducible benchmark records
- Review experimental outcomes
- Prepare research evidence

Potential buyer fit

Computational neuroscience groups / AI research teams / Scientific software vendors

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Experiment records / Benchmark reports / Research documentation

Profile and full editable brief

https://thearchitect-max.github.io/MyProjects/projects/mothercode-research-engine/

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 45,000	**EUR 400,000**

Current repository documentation

Current main baseline: 18.3.

Separate development: 18.4 research target.

The available research implementation is on a development branch. Wider qualification and biological claims remain open.

Material limitations: The asset is experimental research software. Biological equivalence, consciousness and production readiness are not established.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Commercial and delivery boundary

The asking reference and seller-estimated cost to recreate comparable work retain the existing individual assessment. They are not historical expenditure, a contractor quotation, an independent appraisal, demonstrated revenue or a guaranteed buyer saving.

AS IS acquisition is subject to a separate written agreement defining the first-party rights, exact version, delivery manifest and acceptance. Third-party software, data, models, media and service rights retain their own terms. Future development, hosting, operational support, customer content and private credentials are separately scoped or excluded.

Source basis

TA-IP-037-P: product documentation reviewed 16 October 2026. TA-IP-037-C: retained commercial register. TA-IP-037-A: dated seller handover assessment. This catalogue review did not rerun product tests or certify legal, scientific, security or production acceptance.
