Evidence Intelligence Operations Platform

Collect authorized source material, track evidence and changes, and prepare traceable intelligence dossiers and delivery bundles.

Product overview

A multi-source intelligence prototype for monitoring changes and keeping review decisions attributable.

Documented functions

- Retain source evidence
- Review temporal changes
- Define watch rules
- Route material alerts
- Manage subject dossiers and review queues

Potential buyer fit

Intelligence software vendors / Research teams / Corporate analysis teams

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Subject dossiers / Alert queues / Evidence-linked reports

Profile and full editable brief

https://thearchitect-max.github.io/MyProjects/projects/evidence-intelligence-operations-platform/

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 150,000	**EUR 800,000**

Current repository documentation

Current main baseline: 6.3.0.

Separate development: 6.4.0 - unmerged authorized-document connector candidate.

Main is 6.3.0. The separate 6.4.0 candidate adds explicitly authorized, bounded local-document collection and verifiable collection receipts. Its retained report records 54 command gates and 192 tests across six installed environments. Historical 6.0.0 and 6.3.0 failures remain failures; repaired 6.3.1/6.3.2 evidence is retained separately. This publication did not rerun those product gates.

Material limitations: Authorized local-file collection has a bounded platform and policy scope. Historical failed releases are not promoted to PASS, and live external-provider ingestion requires separate qualification.

Next qualification step: Review the exact candidate and delivery manifest; qualify controlled read-only HTTPS/API ingestion and each additional operating-system or provider boundary separately.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Commercial and delivery boundary

The asking reference and seller-estimated cost to recreate comparable work retain the existing individual assessment. They are not historical expenditure, a contractor quotation, an independent appraisal, demonstrated revenue or a guaranteed buyer saving.

AS IS acquisition is subject to a separate written agreement defining the first-party rights, exact version, delivery manifest and acceptance. Third-party software, data, models, media and service rights retain their own terms. Future development, hosting, operational support, customer content and private credentials are separately scoped or excluded.

Source basis

TA-IP-005-P: product documentation reviewed 16 October 2026. TA-IP-005-C: retained commercial register. TA-IP-005-A: dated seller handover assessment. This catalogue review did not rerun product tests or certify legal, scientific, security or production acceptance.
