ORACULUM INFINITUM

Compare external software options for your business or engineering needs before choosing what to integrate.

Product overview

A decision-support product for comparing software building blocks in a declared context.

Documented functions

- Discover software candidates
- Retain reviewable evidence
- Apply declared admission criteria
- Compare candidate suitability
- Record selection rationale

Potential buyer fit

Software architecture teams / Developer-tool vendors / Technology evaluation firms

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Candidate comparisons / Selection records / Evidence packages

Profile and full editable brief

https://thearchitect-max.github.io/MyProjects/projects/oraculum-infinitum/

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 275,000	**EUR 700,000**

Current repository documentation

Current main baseline: 1.0.0.

Available software for evaluation against your intended use. Deployment suitability is assessed separately.

Material limitations: Popularity and selection scores do not prove universal technical superiority. External candidate rights remain separate.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Commercial and delivery boundary

The asking reference and seller-estimated cost to recreate comparable work retain the existing individual assessment. They are not historical expenditure, a contractor quotation, an independent appraisal, demonstrated revenue or a guaranteed buyer saving.

AS IS acquisition is subject to a separate written agreement defining the first-party rights, exact version, delivery manifest and acceptance. Third-party software, data, models, media and service rights retain their own terms. Future development, hosting, operational support, customer content and private credentials are separately scoped or excluded.

Source basis

TA-IP-040-P: product documentation reviewed 16 October 2026. TA-IP-040-C: retained commercial register. TA-IP-040-A: dated seller handover assessment. This catalogue review did not rerun product tests or certify legal, scientific, security or production acceptance.
