QUBO Structural Analysis and Optimization Platform

Compare optimisation approaches and assess candidate solutions within a clearly defined problem scope.

Product overview

An optimisation research prototype for structured problem analysis and comparative studies.

Documented functions

- Characterise supplied problems
- Review connectivity and scale
- Compare bounded candidate solutions
- Measure study resource use
- Retain qualification evidence

Potential buyer fit

Optimisation research teams / Planning software vendors / Scientific software developers

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Problem diagnostics / Solution comparisons / Scaling reports

Profile and full editable brief

https://thearchitect-max.github.io/MyProjects/projects/qubo-structural-analysis-and-optimization-platform/

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 90,000	**EUR 650,000**

Current repository documentation

Current main baseline: 0.2.0.

An implemented prototype for evaluation and further development.

Material limitations: Structural diagnostics do not establish formal impossibility or universal solver superiority. Performance remains problem- and protocol-specific.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Commercial and delivery boundary

The asking reference and seller-estimated cost to recreate comparable work retain the existing individual assessment. They are not historical expenditure, a contractor quotation, an independent appraisal, demonstrated revenue or a guaranteed buyer saving.

AS IS acquisition is subject to a separate written agreement defining the first-party rights, exact version, delivery manifest and acceptance. Third-party software, data, models, media and service rights retain their own terms. Future development, hosting, operational support, customer content and private credentials are separately scoped or excluded.

Source basis

TA-IP-075-P: product documentation reviewed 16 October 2026. TA-IP-075-C: retained commercial register. TA-IP-075-A: dated seller handover assessment. This catalogue review did not rerun product tests or certify legal, scientific, security or production acceptance.
