Radioastronomy Signal Validation Platform

Review telescope signals, compare findings and assess whether candidate observations withstand further scrutiny.

Product overview

A radioastronomy evidence product for reproducible signal screening and comparison.

Documented functions

- Review telescope observations
- Screen candidate signals
- Compare analysis results
- Study calibration and recovery
- Retain observation provenance

Potential buyer fit

Radioastronomy research groups / Scientific data teams / Signal software vendors

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Signal-screening reports / Calibration studies / Evidence histories

Profile and full editable brief

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 275,000	**EUR 1,300,000**

Current repository documentation

Current main baseline: 7.17.0.

Available software for evaluation against your intended use. Deployment suitability is assessed separately.

Material limitations: Candidate screening does not establish extraterrestrial origin. Consolidation into the complete delivery record remains unfinished.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Commercial and delivery boundary

The asking reference and seller-estimated cost to recreate comparable work retain the existing individual assessment. They are not historical expenditure, a contractor quotation, an independent appraisal, demonstrated revenue or a guaranteed buyer saving.

AS IS acquisition is subject to a separate written agreement defining the first-party rights, exact version, delivery manifest and acceptance. Third-party software, data, models, media and service rights retain their own terms. Future development, hosting, operational support, customer content and private credentials are separately scoped or excluded.

Source basis

TA-IP-072-P: product documentation reviewed 16 October 2026. TA-IP-072-C: retained commercial register. TA-IP-072-A: dated seller handover assessment. This catalogue review did not rerun product tests or certify legal, scientific, security or production acceptance.
