Resource-Aware Hybrid Model Orchestration Platform

Plan long-form AI-assisted work, compare model options and continue interrupted tasks within your available resources.

Product overview

A resource-aware generation and revision prototype for managed long-form work.

Documented functions

- Coordinate generation and revision
- Work within declared resource limits
- Retain project state
- Review configurable quality conditions
- Study optional higher-capability review

Potential buyer fit

Writing-tool developers / AI workflow vendors / Research teams

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Long-form work records / Revision plans / Resource-accounting reports

Profile and full editable brief

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 20,000	**EUR 250,000**

Current repository documentation

Current main baseline: No semantic release version established.

Separate development: 0.1.7rc26 - unmerged orchestration candidate.

An implemented release candidate is available on a development branch; production use requires further qualification.

Material limitations: Provider accounts, third-party model rights, deployment configurations and measured long-form quality remain specific to the selected delivery and validation scope.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Commercial and delivery boundary

The asking reference and seller-estimated cost to recreate comparable work retain the existing individual assessment. They are not historical expenditure, a contractor quotation, an independent appraisal, demonstrated revenue or a guaranteed buyer saving.

AS IS acquisition is subject to a separate written agreement defining the first-party rights, exact version, delivery manifest and acceptance. Third-party software, data, models, media and service rights retain their own terms. Future development, hosting, operational support, customer content and private credentials are separately scoped or excluded.

Source basis

TA-IP-028-P: product documentation reviewed 16 October 2026. TA-IP-028-C: retained commercial register. TA-IP-028-A: dated seller handover assessment. This catalogue review did not rerun product tests or certify legal, scientific, security or production acceptance.
