Spatial Wearable Perception Platform

Explore spatial observations and wearable-use scenarios, with captured material available for later review.

Product overview

A spatial-perception software asset for wearable studies and controlled overlays.

Documented functions

- Organise wearable observations
- Track persistent objects
- Maintain spatial overlay state
- Replay recorded sessions
- Prepare qualified release and handover records

Potential buyer fit

Wearable product developers / Spatial software vendors / Perception research teams

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Spatial session records / Overlay states / Evaluation packages

Profile and full editable brief

https://thearchitect-max.github.io/MyProjects/projects/spatial-wearable-perception-platform/

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 800,000	**EUR 3,500,000**

Current repository documentation

Current main baseline: 0.11.1.

Available software for evaluation against your intended use. Deployment suitability is assessed separately.

Material limitations: Recovered and tested software is separate from real-world wearable hardware qualification. Physical accuracy remains unestablished.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Commercial and delivery boundary

The asking reference and seller-estimated cost to recreate comparable work retain the existing individual assessment. They are not historical expenditure, a contractor quotation, an independent appraisal, demonstrated revenue or a guaranteed buyer saving.

AS IS acquisition is subject to a separate written agreement defining the first-party rights, exact version, delivery manifest and acceptance. Third-party software, data, models, media and service rights retain their own terms. Future development, hosting, operational support, customer content and private credentials are separately scoped or excluded.

Source basis

TA-IP-073-P: product documentation reviewed 16 October 2026. TA-IP-073-C: retained commercial register. TA-IP-073-A: dated seller handover assessment. This catalogue review did not rerun product tests or certify legal, scientific, security or production acceptance.
