VIORITH Mobile Camera Overlay

Explore camera overlays and review captured observations for your mobile perception workflows.

Product overview

A phone-first spatial product for camera overlays, observation and session review.

Documented functions

- Review live camera observations
- Display orientation-aware overlays
- Track object identity
- Capture permitted sessions
- Replay recorded session evidence

Potential buyer fit

Mobile experience developers / Perception software vendors / Camera-product teams

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Camera overlays / Session packages / Tracking review records

Profile and full editable brief

https://thearchitect-max.github.io/MyProjects/projects/swpp-viorith-mobile-camera-overlay/

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 180,000	**EUR 850,000**

Current repository documentation

Current main baseline: 0.7.0.

The 0.7.0 source adds semantic-provider and dataset evaluation with strict label, frame-count and scope checks. The README records 30 targeted local checks and JavaScript syntax checks; those do not establish general scene understanding, broad device coverage or independent semantic accuracy.

Material limitations: A targeted supplied-dataset gate does not establish broad semantic accuracy or representative camera/device coverage.

Next qualification step: Qualify the selected semantic provider and representative licensed dataset on the intended camera/browser/device combination.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Commercial and delivery boundary

The asking reference and seller-estimated cost to recreate comparable work retain the existing individual assessment. They are not historical expenditure, a contractor quotation, an independent appraisal, demonstrated revenue or a guaranteed buyer saving.

AS IS acquisition is subject to a separate written agreement defining the first-party rights, exact version, delivery manifest and acceptance. Third-party software, data, models, media and service rights retain their own terms. Future development, hosting, operational support, customer content and private credentials are separately scoped or excluded.

Source basis

TA-IP-081-P: product documentation reviewed 16 October 2026. TA-IP-081-C: retained commercial register. TA-IP-081-A: dated seller handover assessment. This catalogue review did not rerun product tests or certify legal, scientific, security or production acceptance.
