Telluric Actualization Research Platform

Organise geophysical hypotheses and compare the evidence supporting your research questions.

Product overview

A geophysical hypothesis research asset for structured evidence and repeatable studies.

Documented functions

- Organise hypothesis evidence
- Review source-study records
- Track qualification progress
- Prepare repeatable sessions
- Expose missing evidence

Potential buyer fit

Geophysics research groups / Scientific software vendors / Research assurance teams

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Qualification sessions / Hypothesis reports / Evidence review records

Profile and full editable brief

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 55,000	**EUR 600,000**

Current repository documentation

Current main baseline: 0.23.0.dev0.

Experimental research software; scientific conclusions require separate evidence.

Material limitations: The underlying research programme remains speculative and empirically unverified. It is not established as a replacement for accepted physics.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Commercial and delivery boundary

The asking reference and seller-estimated cost to recreate comparable work retain the existing individual assessment. They are not historical expenditure, a contractor quotation, an independent appraisal, demonstrated revenue or a guaranteed buyer saving.

AS IS acquisition is subject to a separate written agreement defining the first-party rights, exact version, delivery manifest and acceptance. Third-party software, data, models, media and service rights retain their own terms. Future development, hosting, operational support, customer content and private credentials are separately scoped or excluded.

Source basis

TA-IP-074-P: product documentation reviewed 16 October 2026. TA-IP-074-C: retained commercial register. TA-IP-074-A: dated seller handover assessment. This catalogue review did not rerun product tests or certify legal, scientific, security or production acceptance.
