Temporal Physics & Causality Research Platform

Explore causal-order questions through controlled computational-physics experiments.

Product overview

A computational physics research asset for falsifiable causal-order studies.

Documented functions

- Define bounded research studies
- Review experimental assumptions
- Analyse declared observation counts
- Compare hypothesis evidence
- Retain reproducible study records

Potential buyer fit

Physics research groups / Metrology teams / Scientific software developers

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Research protocols / Analysis reports / Hypothesis review dossiers

Profile and full editable brief

https://thearchitect-max.github.io/MyProjects/projects/temporal-physics-causality-research-platform/

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 50,000	**EUR 1,050,000**

Current repository documentation

Current main baseline: 0.16.0.

Experimental research software; scientific conclusions require separate evidence.

Material limitations: The physical invention target remains unverified. Computational results do not establish a working device or extraordinary physical capability.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Commercial and delivery boundary

The asking reference and seller-estimated cost to recreate comparable work retain the existing individual assessment. They are not historical expenditure, a contractor quotation, an independent appraisal, demonstrated revenue or a guaranteed buyer saving.

AS IS acquisition is subject to a separate written agreement defining the first-party rights, exact version, delivery manifest and acceptance. Third-party software, data, models, media and service rights retain their own terms. Future development, hosting, operational support, customer content and private credentials are separately scoped or excluded.

Source basis

TA-IP-058-P: product documentation reviewed 16 October 2026. TA-IP-058-C: retained commercial register. TA-IP-058-A: dated seller handover assessment. This catalogue review did not rerun product tests or certify legal, scientific, security or production acceptance.
