TrueLane Studio: Apex Architect

Compare vehicle configurations, examine measured results and review proposed improvements before further tuning work.

Product overview

A vehicle-independent engineering product for comparable tuning and qualification studies.

Documented functions

- Run vehicle configuration studies
- Compare calibration alternatives
- Review learning evidence
- Prepare portable engineering packages
- Replay regression studies

Potential buyer fit

Vehicle engineering teams / Automotive software vendors / Engineering consultancies

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Configuration comparisons / Calibration studies / Qualification packages

Profile and full editable brief

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 300,000	**EUR 1,200,000**

Current repository documentation

Current main baseline: 2.0.0.

The 2.0.0 release has retained external validation. Suitability for your vehicle requires its own evidence.

Material limitations: The asset does not establish world-leading tuning performance or universal vehicle compatibility. Physical qualification remains separately required.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Commercial and delivery boundary

The asking reference and seller-estimated cost to recreate comparable work retain the existing individual assessment. They are not historical expenditure, a contractor quotation, an independent appraisal, demonstrated revenue or a guaranteed buyer saving.

AS IS acquisition is subject to a separate written agreement defining the first-party rights, exact version, delivery manifest and acceptance. Third-party software, data, models, media and service rights retain their own terms. Future development, hosting, operational support, customer content and private credentials are separately scoped or excluded.

Source basis

TA-IP-080-P: product documentation reviewed 16 October 2026. TA-IP-080-C: retained commercial register. TA-IP-080-A: dated seller handover assessment. This catalogue review did not rerun product tests or certify legal, scientific, security or production acceptance.
