Universal Vehicle Configuration Database

Find source-supported vehicle configurations and see where the available information is complete or still uncertain.

Product overview

An independent vehicle-reference product for evidence-backed configuration selection.

Documented functions

- Select supported vehicle configurations
- Review evidence-backed identifiers
- Inspect source qualification
- Handle unsupported selection paths
- Retain configuration lineage

Potential buyer fit

Automotive software vendors / Vehicle-data product teams / Engineering platforms

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Vehicle reference records / Configuration selections / Evidence review packages

Profile and full editable brief

https://thearchitect-max.github.io/MyProjects/projects/universal-vehicle-configuration-database/

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 125,000	**EUR 1,050,000**

Current repository documentation

Current main baseline: 0.5.6.dev0.

Separate development: PR25 draft / portal, API and offline billing foundations.

Evaluate the vehicle-information prototype and its source-evidence research. New portal, API and offline billing work is private development only; no public SaaS or live payments are available.

Material limitations: Data coverage is evidence-dependent. The asset does not supply universal fitment, vehicle tuning authority or rights in external factual records.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Commercial and delivery boundary

The asking reference and seller-estimated cost to recreate comparable work retain the existing individual assessment. They are not historical expenditure, a contractor quotation, an independent appraisal, demonstrated revenue or a guaranteed buyer saving.

AS IS acquisition is subject to a separate written agreement defining the first-party rights, exact version, delivery manifest and acceptance. Third-party software, data, models, media and service rights retain their own terms. Future development, hosting, operational support, customer content and private credentials are separately scoped or excluded.

Source basis

TA-IP-094-P: product documentation reviewed 16 October 2026. TA-IP-094-C: retained commercial register. TA-IP-094-A: dated seller handover assessment. This catalogue review did not rerun product tests or certify legal, scientific, security or production acceptance.
