# Adaptive Audio Production System

Analyse, process and master your audio in one workflow, with quality checks to help you review the result.

## Product overview

A local audio-production foundation for repeatable processing and mastering review.

## Documented functions

- Analyse supported audio
- Apply repeatable processing
- Review mastering targets
- Detect output quality issues
- Retain production manifests

## Potential buyer fit

Audio software vendors / Music production teams / Creator-tool developers

Buyer profiles are positioning suggestions; they are not established customers or contracts.

## Documented output types

Processed audio / Quality reports / Production histories

## Profile and full editable brief

https://thearchitect-max.github.io/MyProjects/projects/adaptive-audio-production-system/

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

# Status and commercial reference

| SELLER ASKING REFERENCE | RECREATION ESTIMATE |
| --- | --- |
| **EUR 95,000** | **EUR 600,000** |

## Current repository documentation

Current main baseline: 0.1.0.

An implemented prototype for evaluation and further development.

Material limitations: The implemented foundation is narrower than the complete product vision. Optional processing capabilities require separate qualification.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

## Individual financial-reference review

Financial-reference review: 16 October 2026. Legacy cost reference; complete work budget missing. Original financial-reference date: 2026-10-12. Seller ask and recreation anchor are retained. Current documentation does not automatically expand the priced delivery; a delivery-specific re-estimate remains required.

## Commercial and delivery boundary

Amounts are retained seller assumptions, not expenditure, a contractor quotation or independent market/income value. AS IS acquisition requires a written agreement defining first-party rights, exact delivery and acceptance. Third-party rights retain their own terms. Future development, hosting, support, customer content and credentials are separately scoped or excluded.

## Source basis

TA-IP-060-P: current documentation. TA-IP-060-C: financial-reference review, 16 October 2026. TA-IP-060-A: retained dated handover assessment. Shared WIPO, Knab and limited Upwork sources provide method/rate context, not asset appraisals. Product tests were not rerun.
