Adaptive General Reasoning Research Platform

Compare reasoning approaches in repeatable experiments and assess which results your evidence supports.

Product overview

A bounded reasoning research platform for repeatable experiments and evidence-led comparison.

Documented functions

- Run reasoning experiments
- Study planning and uncertainty
- Compare research extensions
- Track claim-promotion conditions
- Retain reproducible evidence

Potential buyer fit

AI research groups / Reasoning-tool developers / Scientific software vendors

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Reasoning study records / Comparative reports / Research release material

Profile and full editable brief

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 80,000	**EUR 1,300,000**

Current repository documentation

Current main baseline: 1.52.0.

Experimental research software; scientific conclusions require separate evidence.

Material limitations: Bounded software tests and research outcomes do not establish general intelligence. Broader capability claims require independent comparisons.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Individual financial-reference review

Financial-reference review: 16 October 2026. Legacy cost reference; complete work budget missing. Original financial-reference date: 2026-10-12. Seller ask and recreation anchor are retained. Current documentation does not automatically expand the priced delivery; a delivery-specific re-estimate remains required.

Commercial and delivery boundary

Amounts are retained seller assumptions, not expenditure, a contractor quotation or independent market/income value. AS IS acquisition requires a written agreement defining first-party rights, exact delivery and acceptance. Third-party rights retain their own terms. Future development, hosting, support, customer content and credentials are separately scoped or excluded.

Source basis

TA-IP-064-P: current documentation. TA-IP-064-C: financial-reference review, 16 October 2026. TA-IP-064-A: retained dated handover assessment. Shared WIPO, Knab and limited Upwork sources provide method/rate context, not asset appraisals. Product tests were not rerun.
