TA-IP-076 / Ada / INDEPENDENT IP ASSET

Adaptive Neural Architecture Platform

Evaluate how changes to a learning model affect its performance before choosing a new version.

Product overview

An adaptive learning-model prototype for governed development and candidate acceptance.

Documented functions

- Build and train learning candidates
- Study controlled model growth
- Compare validation outcomes
- Govern candidate acceptance
- Recover and replay retained states

Potential buyer fit

AI product developers / Research groups / Model-engineering teams

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Candidate models / Evaluation records / Recovery material

Profile and full editable brief

https://thearchitect-max.github.io/MyProjects/projects/adaptive-neural-architecture-platform/

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 190,000	**EUR 1,000,000**

Current repository documentation

Current main baseline: 0.5.0.

An implemented prototype for evaluation and further development.

Material limitations: Implemented growth and governance functions do not establish general-purpose superiority. Model performance remains task-specific.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Individual financial-reference review

Financial-reference review: 16 October 2026. Legacy cost reference; complete work budget missing. Original financial-reference date: 2026-10-12. Seller ask and recreation anchor are retained. Current documentation does not automatically expand the priced delivery; a delivery-specific re-estimate remains required.

Commercial and delivery boundary

Amounts are retained seller assumptions, not expenditure, a contractor quotation or independent market/income value. AS IS acquisition requires a written agreement defining first-party rights, exact delivery and acceptance. Third-party rights retain their own terms. Future development, hosting, support, customer content and credentials are separately scoped or excluded.

Source basis

TA-IP-076-P: current documentation. TA-IP-076-C: financial-reference review, 16 October 2026. TA-IP-076-A: retained dated handover assessment. Shared WIPO, Knab and limited Upwork sources provide method/rate context, not asset appraisals. Product tests were not rerun.
