Aletheia Intelligence Fabric

Organise authorised information about people, organisations and events, and review the relationships that matter to your investigation.

Product overview

An entity-intelligence prototype for authorised collection and attributable relationship review.

Documented functions

- Collect permitted source records
- Resolve entity references
- Review relationships
- Detect recorded changes
- Prepare attributable analytical outputs

Potential buyer fit

Corporate analysis teams / Intelligence software vendors / Research organisations

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Entity dossiers / Relationship views / Evidence histories

Profile and full editable brief

https://thearchitect-max.github.io/MyProjects/projects/aletheia-intelligence-fabric/

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 200,000	**EUR 950,000**

Current repository documentation

Current main baseline: 1.1.0.

An implemented prototype for evaluation and further development.

Material limitations: Source access must remain authorised. Analytical correlations do not independently establish factual relationships or intent.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Individual financial-reference review

Financial-reference review: 16 October 2026. Legacy cost reference; complete work budget missing. Original financial-reference date: 2026-10-12. Seller ask and recreation anchor are retained. Current documentation does not automatically expand the priced delivery; a delivery-specific re-estimate remains required.

Commercial and delivery boundary

Amounts are retained seller assumptions, not expenditure, a contractor quotation or independent market/income value. AS IS acquisition requires a written agreement defining first-party rights, exact delivery and acceptance. Third-party rights retain their own terms. Future development, hosting, support, customer content and credentials are separately scoped or excluded.

Source basis

TA-IP-049-P: current documentation. TA-IP-049-C: financial-reference review, 16 October 2026. TA-IP-049-A: retained dated handover assessment. Shared WIPO, Knab and limited Upwork sources provide method/rate context, not asset appraisals. Product tests were not rerun.
