ATHANOR Adaptive Topology, Hazard Analysis, Network Optimization & Resilience

Compare recovery options when your network is disrupted, and review the evidence behind each choice.

Product overview

A resilience research asset for comparing recovery choices under network disruption.

Documented functions

- Create controlled disruption studies
- Compare recovery alternatives
- Assess uncertainty
- Review reasons for selected actions
- Retain repeatable evaluation records

Potential buyer fit

Infrastructure engineering teams / Network research groups / Resilience consultancies

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Recovery comparisons / Scenario reports / Decision records

Profile and full editable brief

https://thearchitect-max.github.io/MyProjects/projects/athanor/

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 95,000	**EUR 520,000**

Current repository documentation

Current main baseline: 3.5.0.

Available software for evaluation against your intended use. Deployment suitability is assessed separately.

Material limitations: Comparisons concern declared software scenarios. Biological interpretations and production-network performance are not established by these experiments.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Individual financial-reference review

Financial-reference review: 16 October 2026. Legacy cost reference; complete work budget missing. Original financial-reference date: 2026-10-12. Seller ask and recreation anchor are retained. Current documentation does not automatically expand the priced delivery; a delivery-specific re-estimate remains required.

Commercial and delivery boundary

Amounts are retained seller assumptions, not expenditure, a contractor quotation or independent market/income value. AS IS acquisition requires a written agreement defining first-party rights, exact delivery and acceptance. Third-party rights retain their own terms. Future development, hosting, support, customer content and credentials are separately scoped or excluded.

Source basis

TA-IP-002-P: current documentation. TA-IP-002-C: financial-reference review, 16 October 2026. TA-IP-002-A: retained dated handover assessment. Shared WIPO, Knab and limited Upwork sources provide method/rate context, not asset appraisals. Product tests were not rerun.
