Aurynthiq Autonomous DJ Intelligence Platform

Prepare DJ sets from your own authorised music, audition transitions and review proposed combinations between recordings.

Product overview

A bring-your-own-music prototype for candidate DJ and mashup discovery.

Documented functions

- Import permitted private music
- Organise a private library
- Screen candidate track combinations
- Audition reviewed previews
- Record permitted export decisions

Potential buyer fit

DJ software vendors / Creator-tool developers / Music production teams

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Candidate pairings / Private previews / Analysis and export records

Profile and full editable brief

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 46,000	**EUR 290,000**

Current repository documentation

Current main baseline: 0.12.0.

Evaluate the v0.12 local music-library and audition prototype using your own authorised recordings. All 184 local software tests passed. Music rights, listening quality, supported-hardware performance and production use require separate acceptance; the optional model-backed full-song separation path remains unqualified.

Material limitations: Musical compatibility is heuristic and quality superiority is unproven. No music catalogue or qualified production SaaS is included.

Next qualification step: Agree the exact v0.12 first-party source and prototype delivery manifest, supported dependencies and recipient acceptance checks.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Individual financial-reference review

Financial-reference review: 16 October 2026. Partial work-package assumptions; complete cost anchor not reconstructed. Original financial-reference date: 2026-10-12. Seller ask and recreation anchor are retained. Current documentation does not automatically expand the priced delivery; a delivery-specific re-estimate remains required.

Commercial and delivery boundary

Amounts are retained seller assumptions, not expenditure, a contractor quotation or independent market/income value. AS IS acquisition requires a written agreement defining first-party rights, exact delivery and acceptance. Third-party rights retain their own terms. Future development, hosting, support, customer content and credentials are separately scoped or excluded.

Source basis

TA-IP-093-P: current documentation. TA-IP-093-C: financial-reference review, 16 October 2026. TA-IP-093-A: retained dated handover assessment. Shared WIPO, Knab and limited Upwork sources provide method/rate context, not asset appraisals. Product tests were not rerun.
