AxiomFactor

Explore mathematical problems and compare computational approaches through controlled research studies.

Product overview

A mathematical computing research product for controlled factorisation and feasibility studies.

Documented functions

- Run bounded factorisation studies
- Compare resource scenarios
- Review timing and uncertainty assumptions
- Explore feasible study configurations
- Retain reproducible calculations

Potential buyer fit

Quantum-computing research teams / Scientific software vendors / Mathematical research groups

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Feasibility reports / Resource comparisons / Study records

Profile and full editable brief

https://thearchitect-max.github.io/MyProjects/projects/axiomfactor/

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 150,000	**EUR 700,000**

Current repository documentation

Current main baseline: 0.22.0.

Available software for evaluation against your intended use. Deployment suitability is assessed separately.

Material limitations: Small research examples and modelled resource studies do not establish large-scale physical computing capability.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Individual financial-reference review

Financial-reference review: 16 October 2026. Legacy cost reference; complete work budget missing. Original financial-reference date: 2026-10-12. Seller ask and recreation anchor are retained. Current documentation does not automatically expand the priced delivery; a delivery-specific re-estimate remains required.

Commercial and delivery boundary

Amounts are retained seller assumptions, not expenditure, a contractor quotation or independent market/income value. AS IS acquisition requires a written agreement defining first-party rights, exact delivery and acceptance. Third-party rights retain their own terms. Future development, hosting, support, customer content and credentials are separately scoped or excluded.

Source basis

TA-IP-042-P: current documentation. TA-IP-042-C: financial-reference review, 16 October 2026. TA-IP-042-A: retained dated handover assessment. Shared WIPO, Knab and limited Upwork sources provide method/rate context, not asset appraisals. Product tests were not rerun.
