Causal State Field Engine

Review how system states change over time and follow the recorded context behind each change.

Product overview

A state-record integrity product for attributable change and selective review.

Documented functions

- Record declared state changes
- Preserve historical continuity
- Replay retained transitions
- Disclose selected records
- Review record-authentication lifecycle

Potential buyer fit

Audit software vendors / Enterprise systems teams / Assurance product developers

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Change journals / Audit records / Selective disclosure packages

Profile and full editable brief

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 115,000	**EUR 625,000**

Current repository documentation

Current main baseline: 0.8.0.

Available software for evaluation against your intended use. Deployment suitability is assessed separately.

Material limitations: Record integrity does not establish the truth of supplied facts or physical causality. Declared relationships remain declarations.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Individual financial-reference review

Financial-reference review: 16 October 2026. Legacy cost reference; complete work budget missing. Original financial-reference date: 2026-10-12. Seller ask and recreation anchor are retained. Current documentation does not automatically expand the priced delivery; a delivery-specific re-estimate remains required.

Commercial and delivery boundary

Amounts are retained seller assumptions, not expenditure, a contractor quotation or independent market/income value. AS IS acquisition requires a written agreement defining first-party rights, exact delivery and acceptance. Third-party rights retain their own terms. Future development, hosting, support, customer content and credentials are separately scoped or excluded.

Source basis

TA-IP-061-P: current documentation. TA-IP-061-C: financial-reference review, 16 October 2026. TA-IP-061-A: retained dated handover assessment. Shared WIPO, Knab and limited Upwork sources provide method/rate context, not asset appraisals. Product tests were not rerun.
