CAUSORYN

Explore how changes could affect interconnected systems, compare alternative scenarios and review the recorded outcomes.

Product overview

A connected-system modelling prototype for comparable what-if experiments.

Documented functions

- Compose linked system studies
- Compare declared scenarios
- Review supplied observations
- Run local combined simulations
- Retain attributable histories

Potential buyer fit

Digital-twin vendors / Systems research groups / Engineering consultancies

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Scenario comparisons / Observation records / Simulation histories

Profile and full editable brief

https://thearchitect-max.github.io/MyProjects/projects/causoryn/

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 48,000	**EUR 160,000**

Current repository documentation

Current main baseline: v0.6.0.

Compare connected-system scenarios and review recorded observations with the locally tested prototype. Check its documented limitations and incomplete acquisition handover against your intended use.

Material limitations: The implementation does not establish physical equivalence, live sensing or autonomous optimisation. Distributed coupling remains future work.

Next qualification step: Complete and freeze the acquisition evidence, rights and release-specific handover scope; separately qualify the intended domain.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Individual financial-reference review

Financial-reference review: 16 October 2026. Disclosed base/increment budgets reconcile; effort remains an unverified seller assumption. Original financial-reference date: 2026-10-11. Seller ask and recreation anchor are retained. Current documentation does not automatically expand the priced delivery; a delivery-specific re-estimate remains required.

Commercial and delivery boundary

Amounts are retained seller assumptions, not expenditure, a contractor quotation or independent market/income value. AS IS acquisition requires a written agreement defining first-party rights, exact delivery and acceptance. Third-party rights retain their own terms. Future development, hosting, support, customer content and credentials are separately scoped or excluded.

Source basis

TA-IP-097-P: current documentation. TA-IP-097-C: financial-reference review, 16 October 2026. TA-IP-097-A: retained dated handover assessment. Shared WIPO, Knab and limited Upwork sources provide method/rate context, not asset appraisals. Product tests were not rerun.
