Content Integrity Assurance Platform

Review content and supporting evidence so you can make more accountable integrity decisions.

Product overview

A content-integrity product for reviewable source collection and evidence handling.

Documented functions

- Organise isolated review workspaces
- Collect permitted source evidence
- Retain content histories
- Review attributable receipts
- Prepare controlled evidence packages

Potential buyer fit

Content assurance vendors / Research publishers / Evidence software teams

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Integrity findings / Review records / Evidence packages

Profile and full editable brief

https://thearchitect-max.github.io/MyProjects/projects/content-integrity-assurance-platform/

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 400,000	**EUR 1,600,000**

Current repository documentation

Current main baseline: 60.0.0.

Available software for evaluation against your intended use. Deployment suitability is assessed separately.

Material limitations: Trusted records and content integrity are distinct from factual truth. Content-analysis conclusions retain their declared evidence limits.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Individual financial-reference review

Financial-reference review: 16 October 2026. Legacy cost reference; complete work budget missing. Original financial-reference date: 2026-10-12. Seller ask and recreation anchor are retained. Current documentation does not automatically expand the priced delivery; a delivery-specific re-estimate remains required.

Commercial and delivery boundary

Amounts are retained seller assumptions, not expenditure, a contractor quotation or independent market/income value. AS IS acquisition requires a written agreement defining first-party rights, exact delivery and acceptance. Third-party rights retain their own terms. Future development, hosting, support, customer content and credentials are separately scoped or excluded.

Source basis

TA-IP-071-P: current documentation. TA-IP-071-C: financial-reference review, 16 October 2026. TA-IP-071-A: retained dated handover assessment. Shared WIPO, Knab and limited Upwork sources provide method/rate context, not asset appraisals. Product tests were not rerun.
