Custody Integrity Assurance Platform

Track custody handovers and examine whether the accompanying records support a clear chain of responsibility.

Product overview

A custody-assurance prototype for accountable transfers between managed organisations.

Documented functions

- Record custody transitions
- Preserve transfer history
- Review implementation conformance
- Study operational recovery
- Prepare independent review material

Potential buyer fit

Supply-chain software vendors / Custody service providers / Audit and assurance teams

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Custody records / Conformance reports / Continuity evidence

Profile and full editable brief

https://thearchitect-max.github.io/MyProjects/projects/custody-integrity-assurance-platform/

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 140,000	**EUR 750,000**

Current repository documentation

Current main baseline: 0.4.0.

A candidate reference implementation; independent review and operational approval remain pending.

Material limitations: This is a candidate software and specification asset. Real operational conformity, independent approval and deployment are not established.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Individual financial-reference review

Financial-reference review: 16 October 2026. Legacy cost reference; complete work budget missing. Original financial-reference date: 2026-10-12. Seller ask and recreation anchor are retained. Current documentation does not automatically expand the priced delivery; a delivery-specific re-estimate remains required.

Commercial and delivery boundary

Amounts are retained seller assumptions, not expenditure, a contractor quotation or independent market/income value. AS IS acquisition requires a written agreement defining first-party rights, exact delivery and acceptance. Third-party rights retain their own terms. Future development, hosting, support, customer content and credentials are separately scoped or excluded.

Source basis

TA-IP-009-P: current documentation. TA-IP-009-C: financial-reference review, 16 October 2026. TA-IP-009-A: retained dated handover assessment. Shared WIPO, Knab and limited Upwork sources provide method/rate context, not asset appraisals. Product tests were not rerun.
