Dominus Kraken Execution Engine

Evaluate market decisions, trading workflows and recovery scenarios within a controlled research environment.

Product overview

A trading-research and execution-workflow asset with conservative operational controls.

Documented functions

- Review public-market observations
- Compare research decisions
- Study operational recovery
- Retain chronological evaluation evidence
- Keep research separate from live authority

Potential buyer fit

Trading infrastructure developers / Quantitative research teams / Market-data product vendors

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Research histories / Paper-decision records / Recovery reports

Profile and full editable brief

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 800,000	**EUR 3,000,000**

Current repository documentation

Current main baseline: 3.8.0.

Available software for evaluation against your intended use. Deployment suitability is assessed separately.

Material limitations: Live trading is disabled by default. Retained observations do not establish profitability or sufficient market evidence.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Individual financial-reference review

Financial-reference review: 16 October 2026. Legacy cost reference; complete work budget missing. Original financial-reference date: 2026-10-12. Seller ask and recreation anchor are retained. Current documentation does not automatically expand the priced delivery; a delivery-specific re-estimate remains required.

Commercial and delivery boundary

Amounts are retained seller assumptions, not expenditure, a contractor quotation or independent market/income value. AS IS acquisition requires a written agreement defining first-party rights, exact delivery and acceptance. Third-party rights retain their own terms. Future development, hosting, support, customer content and credentials are separately scoped or excluded.

Source basis

TA-IP-026-P: current documentation. TA-IP-026-C: financial-reference review, 16 October 2026. TA-IP-026-A: retained dated handover assessment. Shared WIPO, Knab and limited Upwork sources provide method/rate context, not asset appraisals. Product tests were not rerun.
