Engineering Intelligence & Mastery Platform (EIMP)

Organise engineering knowledge, assess your understanding and support better-informed technical decisions.

Product overview

An engineering knowledge workbench for specialist research, learning structure and assessment inputs.

Documented functions

- Organise engineering knowledge domains
- Allocate specialist research scope
- Track evidence and research gaps
- Prepare assessment inputs
- Review knowledge-promotion status

Potential buyer fit

Engineering education vendors / Research organisations / Technical knowledge teams

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Research programmes / Learning structures / Gap and evidence reports

Profile and full editable brief

https://thearchitect-max.github.io/MyProjects/projects/engineering-intelligence-mastery-platform/

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 80,000	**EUR 450,000**

Current repository documentation

Current main baseline: 0.50.0.

An implemented prototype for evaluation and further development.

Material limitations: Coherent software records do not turn research claims into verified engineering knowledge. Specialist research remains in progress.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Individual financial-reference review

Financial-reference review: 16 October 2026. Legacy cost reference; complete work budget missing. Original financial-reference date: 2026-10-12. Seller ask and recreation anchor are retained. Current documentation does not automatically expand the priced delivery; a delivery-specific re-estimate remains required.

Commercial and delivery boundary

Amounts are retained seller assumptions, not expenditure, a contractor quotation or independent market/income value. AS IS acquisition requires a written agreement defining first-party rights, exact delivery and acceptance. Third-party rights retain their own terms. Future development, hosting, support, customer content and credentials are separately scoped or excluded.

Source basis

TA-IP-036-P: current documentation. TA-IP-036-C: financial-reference review, 16 October 2026. TA-IP-036-A: retained dated handover assessment. Shared WIPO, Knab and limited Upwork sources provide method/rate context, not asset appraisals. Product tests were not rerun.
