Evidence-Governed Software Assurance Platform

Compare software components against your requirements and review the evidence before selecting them.

Product overview

A software-assurance asset for controlled component discovery and qualification.

Documented functions

- Discover candidate components
- Review capability and rights evidence
- Compare benchmark records
- Control qualification decisions
- Retain governance and recovery histories

Potential buyer fit

Developer-tool companies / Software assurance teams / Enterprise architecture groups

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Component dossiers / Comparison records / Qualification decisions

Profile and full editable brief

https://thearchitect-max.github.io/MyProjects/projects/evidence-governed-software-assurance-platform/

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 475,000	**EUR 1,200,000**

Current repository documentation

Current main baseline: 40.0.0.

Available software for evaluation against your intended use. Deployment suitability is assessed separately.

Material limitations: The offered IP is the original assurance product. External components retain their own ownership and licence terms.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Individual financial-reference review

Financial-reference review: 16 October 2026. Legacy cost reference; complete work budget missing. Original financial-reference date: 2026-10-12. Seller ask and recreation anchor are retained. Current documentation does not automatically expand the priced delivery; a delivery-specific re-estimate remains required.

Commercial and delivery boundary

Amounts are retained seller assumptions, not expenditure, a contractor quotation or independent market/income value. AS IS acquisition requires a written agreement defining first-party rights, exact delivery and acceptance. Third-party rights retain their own terms. Future development, hosting, support, customer content and credentials are separately scoped or excluded.

Source basis

TA-IP-039-P: current documentation. TA-IP-039-C: financial-reference review, 16 October 2026. TA-IP-039-A: retained dated handover assessment. Shared WIPO, Knab and limited Upwork sources provide method/rate context, not asset appraisals. Product tests were not rerun.
