Evidence-Grounded Multi-Expert Reasoning System

Compare multiple perspectives on a complex question and inspect the evidence behind their conclusions.

Product overview

An evidence-grounded reasoning product for specialist review and measurable comparisons.

Documented functions

- Route problems to specialist review
- Ground claims in supplied evidence
- Expose contradictions
- Run bounded checks
- Retain reproducible evaluation records

Potential buyer fit

AI product companies / Enterprise reasoning teams / Research organisations

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Evidence-linked conclusions / Contradiction reports / Benchmark dossiers

Profile and full editable brief

https://thearchitect-max.github.io/MyProjects/projects/evidence-grounded-multi-expert-reasoning-system/

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 500,000	**EUR 1,800,000**

Current repository documentation

Current main baseline: 1.7.0.

Separate development: 1.8.0 capability-study candidate.

Use the validated v1.7.0 release as the current evidence baseline. The newer v1.8.0 candidate has completed static review and awaits full runtime and distribution validation.

Material limitations: General AI or human-expert superiority remains a research objective. The established release demonstrates an engineering framework.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Individual financial-reference review

Financial-reference review: 16 October 2026. Legacy cost reference; complete work budget missing. Original financial-reference date: 2026-10-12. Seller ask and recreation anchor are retained. Current documentation does not automatically expand the priced delivery; a delivery-specific re-estimate remains required.

Commercial and delivery boundary

Amounts are retained seller assumptions, not expenditure, a contractor quotation or independent market/income value. AS IS acquisition requires a written agreement defining first-party rights, exact delivery and acceptance. Third-party rights retain their own terms. Future development, hosting, support, customer content and credentials are separately scoped or excluded.

Source basis

TA-IP-053-P: current documentation. TA-IP-053-C: financial-reference review, 16 October 2026. TA-IP-053-A: retained dated handover assessment. Shared WIPO, Knab and limited Upwork sources provide method/rate context, not asset appraisals. Product tests were not rerun.
