FusionLunar Energy Systems Engineering Platform

Compare energy and lunar-logistics concepts for your systems-engineering studies, with a separately scoped launch and transport module.

Product overview

An energy and lunar-infrastructure research platform with traceable engineering studies.

Documented functions

- Compare energy-system scenarios
- Study lunar infrastructure
- Review logistics dependencies
- Assess engineering uncertainty
- Retain qualified release records

Potential buyer fit

Energy research groups / Aerospace consultancies / Mission architecture teams

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Architecture comparisons / Engineering studies / Qualification dossiers

Profile and full editable brief

https://thearchitect-max.github.io/MyProjects/projects/fusionlunar-energy-systems-engineering-platform/

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 360,000	**EUR 2,900,000**

Current repository documentation

Current main baseline: 0.46.0.

Evaluate energy and lunar-infrastructure concepts with the implemented prototype. Launch & Cislunar Transportation Engineering Platform is its separate transport module; review both scopes and qualify the combined workflow for your intended study.

Material limitations: Qualified software studies do not establish functioning energy hardware or completed transport-system integration.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Individual financial-reference review

Financial-reference review: 16 October 2026. Legacy cost reference; complete work budget missing. Original financial-reference date: 2026-10-12. Seller ask and recreation anchor are retained. Current documentation does not automatically expand the priced delivery; a delivery-specific re-estimate remains required.

Commercial and delivery boundary

Amounts are retained seller assumptions, not expenditure, a contractor quotation or independent market/income value. AS IS acquisition requires a written agreement defining first-party rights, exact delivery and acceptance. Third-party rights retain their own terms. Future development, hosting, support, customer content and credentials are separately scoped or excluded.

Source basis

TA-IP-057-P: current documentation. TA-IP-057-C: financial-reference review, 16 October 2026. TA-IP-057-A: retained dated handover assessment. Shared WIPO, Knab and limited Upwork sources provide method/rate context, not asset appraisals. Product tests were not rerun.
