GoldenNet Signal Intelligence Platform

Review signal patterns and maintenance-model results before selecting a model for your intended use.

Product overview

A signal-intelligence product for condition review and maintenance research.

Documented functions

- Review time-series conditions
- Identify modelled anomalies
- Estimate remaining service life
- Monitor governed inference
- Retain release evidence

Potential buyer fit

Industrial AI vendors / Maintenance software developers / Equipment research teams

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Condition scores / Maintenance study reports / Model qualification records

Profile and full editable brief

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 425,000	**EUR 1,800,000**

Current repository documentation

Current main baseline: 0.10.0.

Available software for evaluation against your intended use. Deployment suitability is assessed separately.

Material limitations: Official external benchmark performance is not asserted without retained evidence. Field reliability requires its own qualification.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Individual financial-reference review

Financial-reference review: 16 October 2026. Legacy cost reference; complete work budget missing. Original financial-reference date: 2026-10-12. Seller ask and recreation anchor are retained. Current documentation does not automatically expand the priced delivery; a delivery-specific re-estimate remains required.

Commercial and delivery boundary

Amounts are retained seller assumptions, not expenditure, a contractor quotation or independent market/income value. AS IS acquisition requires a written agreement defining first-party rights, exact delivery and acceptance. Third-party rights retain their own terms. Future development, hosting, support, customer content and credentials are separately scoped or excluded.

Source basis

TA-IP-054-P: current documentation. TA-IP-054-C: financial-reference review, 16 October 2026. TA-IP-054-A: retained dated handover assessment. Shared WIPO, Knab and limited Upwork sources provide method/rate context, not asset appraisals. Product tests were not rerun.
