HΛRM LYRA Automotive

Explore the LYRA automotive concept and compare its design assumptions through engineering analysis and simulation.

Product overview

An automotive engineering-analysis asset for the LYRA RS programme.

Documented functions

- Maintain design parameters
- Review chassis and powertrain studies
- Compare aerodynamic calculations
- Track structural evidence
- Export engineering telemetry

Potential buyer fit

Automotive research teams / Engineering consultancies / Vehicle concept developers

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Design study records / Parameter dossiers / Engineering comparisons

Profile and full editable brief

https://thearchitect-max.github.io/MyProjects/projects/h-rm-lyra-automotive-lyra-rs-3-6t/

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 55,000	**EUR 450,000**

Current repository documentation

Current main baseline: 0.1.0.

An implemented prototype for evaluation and further development.

Material limitations: Design targets, derived calculations and external evidence are distinct. No manufactured vehicle or homologation is included.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Individual financial-reference review

Financial-reference review: 16 October 2026. Legacy cost reference; complete work budget missing. Original financial-reference date: 2026-10-12. Seller ask and recreation anchor are retained. Current documentation does not automatically expand the priced delivery; a delivery-specific re-estimate remains required.

Commercial and delivery boundary

Amounts are retained seller assumptions, not expenditure, a contractor quotation or independent market/income value. AS IS acquisition requires a written agreement defining first-party rights, exact delivery and acceptance. Third-party rights retain their own terms. Future development, hosting, support, customer content and credentials are separately scoped or excluded.

Source basis

TA-IP-090-P: current documentation. TA-IP-090-C: financial-reference review, 16 October 2026. TA-IP-090-A: retained dated handover assessment. Shared WIPO, Knab and limited Upwork sources provide method/rate context, not asset appraisals. Product tests were not rerun.
