Industrial Predictive Maintenance & RUL Platform

Study equipment condition and compare remaining-life estimates to support your maintenance research.

Product overview

An industrial prediction asset for condition modelling and remaining-life studies.

Documented functions

- Organise machine telemetry
- Review data quality
- Compare condition models
- Estimate remaining service life
- Retain validation evidence

Potential buyer fit

Maintenance software vendors / Industrial research groups / Equipment-data teams

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Prediction records / Quality reports / Benchmark dossiers

Profile and full editable brief

https://thearchitect-max.github.io/MyProjects/projects/industrial-predictive-maintenance-rul-platform/

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 360,000	**EUR 1,000,000**

Current repository documentation

Current main baseline: 0.2.0.

Available software for evaluation against your intended use. Deployment suitability is assessed separately.

Material limitations: Software and synthetic studies are not evidence of field-wide accuracy. Customer telemetry and external data rights remain separately scoped.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Individual financial-reference review

Financial-reference review: 16 October 2026. Legacy cost reference; complete work budget missing. Original financial-reference date: 2026-10-12. Seller ask and recreation anchor are retained. Current documentation does not automatically expand the priced delivery; a delivery-specific re-estimate remains required.

Commercial and delivery boundary

Amounts are retained seller assumptions, not expenditure, a contractor quotation or independent market/income value. AS IS acquisition requires a written agreement defining first-party rights, exact delivery and acceptance. Third-party rights retain their own terms. Future development, hosting, support, customer content and credentials are separately scoped or excluded.

Source basis

TA-IP-059-P: current documentation. TA-IP-059-C: financial-reference review, 16 October 2026. TA-IP-059-A: retained dated handover assessment. Shared WIPO, Knab and limited Upwork sources provide method/rate context, not asset appraisals. Product tests were not rerun.
