ISBR SecureTrace

Follow asset histories, review supporting records and assess what is ready for a documented handover.

Product overview

A registry and assurance product for attributable assets, evidence and handover records.

Documented functions

- Register digital asset identities
- Link claims to evidence
- Maintain record histories
- Prepare assurance dossiers
- Review transfer and recovery records

Potential buyer fit

Registry software vendors / Assurance service firms / Enterprise audit teams

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Asset registries / Assurance dossiers / Transfer histories

Profile and full editable brief

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 650,000	**EUR 2,800,000**

Current repository documentation

Current main baseline: 2.4.0.

Separate development: Assurance 5.1.

The released core and the newer assurance development line are presented separately.

Material limitations: The release and later development are separately recorded. Wet-laboratory results and regulatory certification are outside the established software scope.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Individual financial-reference review

Financial-reference review: 16 October 2026. Legacy cost reference; complete work budget missing. Original financial-reference date: 2026-10-12. Seller ask and recreation anchor are retained. Current documentation does not automatically expand the priced delivery; a delivery-specific re-estimate remains required.

Commercial and delivery boundary

Amounts are retained seller assumptions, not expenditure, a contractor quotation or independent market/income value. AS IS acquisition requires a written agreement defining first-party rights, exact delivery and acceptance. Third-party rights retain their own terms. Future development, hosting, support, customer content and credentials are separately scoped or excluded.

Source basis

TA-IP-044-P: current documentation. TA-IP-044-C: financial-reference review, 16 October 2026. TA-IP-044-A: retained dated handover assessment. Shared WIPO, Knab and limited Upwork sources provide method/rate context, not asset appraisals. Product tests were not rerun.
