Launch & Cislunar Transportation Engineering Platform

Assess launch and lunar transport options for your FusionLunar studies, compare their assumptions and review the evidence needed for further engineering.

Product overview

A transport-architecture research foundation for launch and lunar logistics choices.

Documented functions

- Describe mission requirements
- Compare transport routes
- Screen architecture choices
- Review reliability and logistics assumptions
- Retain decision evidence

Potential buyer fit

Aerospace consultancies / Mission architecture teams / Transport research groups

Buyer profiles are positioning suggestions; they are not established customers or contracts.

Documented output types

Transport comparisons / Mission studies / Architecture review records

Profile and full editable brief

The full editable brief accompanies this factsheet and retains the detailed product and transaction boundaries.

Status and commercial reference

SELLER ASKING REFERENCE	RECREATION ESTIMATE
EUR 15,000	**EUR 50,000**

Current repository documentation

Current main baseline: v0.1.0.dev0.

Separate development: v0.2 refueling-study candidate; unmerged.

Use the v0.1 transport-concept software for your FusionLunar studies. A separate unmerged v0.2 draft adds refueling and departure-study controls with isolated synthetic checks; full frozen-source integration and release qualification remain open. Flight qualification and completed joint FusionLunar integration are not established. Existing prices are retained.

Material limitations: The foundation is distinct from a qualified launch vehicle or flight system. Joint integration with energy studies and newer refuelling work remain separate.

Next qualification step: Evidence a reproducible release, agreed component and rights boundaries, use-specific qualification and recipient acceptance of the defined software package.

Documentation checked: 16 October 2026. Product tests were not rerun for this catalogue. Prior execution evidence, handover grades and financial assessments retain their individual dates and version scope.

Individual financial-reference review

Financial-reference review: 16 October 2026. Disclosed base/increment budgets reconcile; effort remains an unverified seller assumption. Original financial-reference date: 2026-10-11. Seller ask and recreation anchor are retained. Current documentation does not automatically expand the priced delivery; a delivery-specific re-estimate remains required.

Commercial and delivery boundary

Amounts are retained seller assumptions, not expenditure, a contractor quotation or independent market/income value. AS IS acquisition requires a written agreement defining first-party rights, exact delivery and acceptance. Third-party rights retain their own terms. Future development, hosting, support, customer content and credentials are separately scoped or excluded.

Source basis

TA-IP-099-P: current documentation. TA-IP-099-C: financial-reference review, 16 October 2026. TA-IP-099-A: retained dated handover assessment. Shared WIPO, Knab and limited Upwork sources provide method/rate context, not asset appraisals. Product tests were not rerun.
